

July 12, 2020

To,  
The Editor,  
The Sedimentary Record,  
The Society for Sedimentary Geology (SEPM)

Dear Editor,

We are submitting the accompanying manuscript entitled “*Enriching Lives within Sedimentary Geology*”: *Evaluating SEPM’s Role in Diversity, Equity, and Inclusion* for consideration to be published in the Sedimentary Record.

In this work, we review a few key records of the Society for Sedimentary Geology with the intent of encouraging an open and transparent conversation about diversity, equity and inclusion within the sedimentary geology community. We also provide a few recommendations for improvement. We believe this is important and relevant to the whole community, and an open discussion of this nature is now long overdue.

Sincerely,

Dr. Anjali M. Fernandes
